Date 8 January 2024

Source <https://twitter.com/NWSstornado/status/1744588740612464948>

Author [National Weather Service](#) in [Honolulu, Hawaii](#)

Licensing

*This image is in the **public domain** because it was stored on the web servers of the U.S. [National Weather Service](#). NWS-created images are automatically public domain in the U.S. since the NWS is a part of the U.S. government. However, the NWS sites also host non-NWS images which have been submitted by individuals: these are generally shown as "Courtesy of ...". Such images have explicitly been released to the public domain by the copyright owner as part of the upload process.*

As stated at <https://www.weather.gov/fsd/disclaimer>: "By submitting images, you understand that your image is being released into the public domain. This means that your photo or video may be downloaded, copied, and used by others."

Thus, all* images on NWS servers are public domain (including "Courtesy of ..." and "Photo by ..." images) unless specifically stated otherwise through a copyright (©) watermark.

*A [deletion discussion](#) in November 2023 ruled that [Getty Images](#) on the web servers of NWS, are to be considered copyrighted, even without a copyright (©) watermark and are the [sole exception](#) to this rule.
